If you've been waiting for something teenage mutant ninja turtles-themed that's not a nasty movie or macaroni and cheese, then Activision has some very good news for you. Teen Mutant Ninja Turtles: Mutants in Manhattan are on their way, and this is designed to be one of the best action studios in the industry. Heroes of Half Shell are returning to the streets of New York, and they are doing it with the kind of style that only PlatinumGames can deliver. Activision's Josh Engen says in an official statement. The Japanese action maker, best known for Bayonetta and Metal Gear Rising, recently worked with Activision on Transformers: Devastation last year. The devastation drew visual inspiration from the classic transformer television series, but according to Activision, this time PlatinumGames draws inspiration from turtle comics. It means brighter corners and a dark, pencil-loving detail mixed with cheesy humor, which has become such a staple of the series. However, as is clearly stated in the trailer mentioned above, the fight of this game is pure PlatinumGames. The attacks are brutal and fast, with numerous particle effects, and it seems that there will be several movements that simultaneously use all four turtles. As someone who is quite hesitant, it's also good news that mutants in Manhattan allow you to go between Leonardo, Michelangelo, Donatello and Raphael at any time, and the game will also support collaborative play. However, the language Activision uses suggests that this can only be an online co-op, so you and your buddy may need to order separate peanut butter and sardine pizzas. Teen mutant Ninja Turtles: Mutants in Manhattan hits Xbox One, Xbox 360, PlayStation 4, PlayStation 3, and PC this summer. Prepare swords and headbands in advance. Editor's Recommendations Image: Nickelodeon If you find it difficult to motivate your child to get out of bed in the mornings, you may want to consider recruiting some animated characters. Google's assistant characters are signalling the use of voiceovers and music from popular animated franchises such as Nickelodeon's Rise of teenage Mutant Ninja Turtles, Lego, and Hatchimals. These options can be a little difficult for you as adults to listen to, but it's much more enjoyable than screaming at your kids awakening. Character signals have been available on smart speakers and other Google devices from late 2018, but Google has just released an updated version of the feature of smart home display devices like The Google Home Hub. When enabled on smart screens, the alarm is accompanied by character portraits and other customized user interface elements based on a symbol or franchise. Here is all the Character Alarm currently available on Google Assistant: Hatchimals: Alarms based on Hatchtopia's animated series Adventures, featuring several characters who tell jokes and provide a series of trivia as well as interactive puzzles. Lego City: This alarm contains news anchor character Jake Early, who reads the news based on the Lego and Lego City animated series. Lego Life: Includes music, Lego trivia and Lego design project ideas. Lego Friends: Features fully voiced stories from the Lego Friends series. Teenage Mutant Ninja Turtles Characters: These customizable alarms focus on a specific member of the TMNT team, as well as mini storylines included the show's entire cast. Each alarm is characterized by slightly different wake-up methods based on the personality of that character. Leonardo: Jokes and QuipsMichelangelo: Daily AffirmationsRaphael: Positivity and MotivationDonatello: Science triviaApril O'Neil: Life tipsHow to enable character alarms with Google AssistantWhile Character Alarm is available in a wide range of Google Assistant supported smart speakers and screen hubs, they are currently limited to the U.S. and Canada. If you are in those regions and the device is connected to a Wi-Fi network, you can turn on the character alarm using the following voice commands:Hey, Google, set the character signal Hey, Google, set the [character name] alarmPad0 can also specify the alarm date/time below and how often it repeats. To stop the alarm, you'll need to use voice commands Hey Google, stop alarm or Hey Google, stop, although smart display devices will also let you control them through your device's touchscreen. More Google Assistant alarm commands can be found on the Google Character Alarm Support page. I was just wondering, Does any of you ever look past the third page of new topics and recent posts? I only look at the first three pages or so. Just wonderin'. Take a trip down memory lane that will help you feel nostalgia at What is the essence of teenage Mutant Ninja Turtles? Their descriptive name provides basic biographical information, but, in addition to Turtle Power, what are the heroes on the side of the shell? Since its premiere on Nickelodeon on September 29, the updated animated version of Teenage Mutant Ninja Turtles (TMNT) has averaged 3.4 million viewers per episode-bad sewer dwelling amphibians that first hatched in the mid'80s as a self-published graphic novel and has been crowded at various times ever since. Now, Nickelodeon tapped by New York-based production company Starlight Runner Answer the question of what turtles are really made in order to prep prep franchise for multi-platform growth – websites, apps, brand line and ultimately feature film. We had to understand the essence of the property, says Starlight Runner's comrade Jeff Gomez. What are the archetypal elements that resonate deep inside the audience when they watch and enjoy this property? There is something about being unique and rings true because it touches the hearts and primary minds of people and has transcended for decades. In order to create a cohesive storytelling for TMNT, the Starlight Runner team, which specializes in transmedia stories, studied all the existing content assets, including various TELEVISION incarnations of turtles, movies, games, and merchandise. At one point during the height of the TMNT obsession, in addition to the usual action figures, trading cards and video games, there were a grain of TMNT Pez dispensers and ninja turtles. Hostess even produced Teenage Mutant Ninja Turtles Cakes (filled with Vanilla's Puttin' Power!). Nickelodeon really wanted to honor the world of teenage mutant Ninja Turtles, says Starlight Runner Entertainment cofounder Mark S. Pensavalle. We looked at everything that was ever created related to ninja turtles. The result was Mythology, a 450-page document containing profiles for all characters, places, famous artifacts, vehicles and weapons. It contains the whole of the world of history, says Gomez. The essence of TMNT eventually came in the face of concepts of brotherhood and united challenges rather than constantly trying to go alone, said Gomez. But it was clear that to stay fresh for the next generation, wealth had to change and adapt. Old school ninja turtles had a little puffed moroseness, says Gomez. They were outsiders. It wasn't great to be green and live in the sewer. But it shifted. Now there is a nerd or a strange dude outside or kind of being cool. It's very positive and very different personalities, says Gomez. Nickelodeon was a smart individual to their characters so they each have separate storylines. Starlight Runner (which Fast Company was included in one of the 10 most innovative media companies in 2011) has done similar work on transmedia for large multi-platform projects such as Avatar, Tron Legacy, Pirates of the Caribbean and Transformers. We see transmedia as an art form and communication methodology that will be vital over the next decade, says Gomez. This is a new way of thinking, allowing holders of intellectual property or brands to create a new way of telling. Story.
